

Business Information Systems, Inc.

Commercial Credit Reporting

B.I.S. Overview

Who is BIS?

BIS is a U.S. based company whose principals have many years of information technology development and/or practical use of credit reporting information.

The Product

The product is a uniquely superior, worldwide database of credit and other useable, up-to-date business information, such as company officials, products and services.

Benefits of Using BIS

Prevention of loss of Accounts Receivable through enhancing the credit decision process.

Free advertising by inclusion of your company information on widely distributed reports seen by many decision makers.

More reliable, more useable, less costly credit information.

A product supported by industry leaders, including numerous Chambers of Commerce.
